Personal Profile:

1st year Cybersecurity Undergraduate with growing arsenal of knowledge and skills surrounding the cybersecurity and computing sector. Experienced with both Windows and Linux systems over the years. My skillset includes Analytical thinking, problem solving, communication, dedication, time management, organisational skills. From the great experience at university, I can both thrive in situations where either teamwork or individual work is needed. When combining my academic and personal life I feel that I'm a better individual especially working with stressful situations in a calm and collective manor.

Education & Qualifications:

2021 - 2024   Canterbury Christ Church University
BSc (Hons) Computer Forensics and Security
Main subjects: C# Development, Computer Forensics and Cybersecurity, Fundamentals of Computer Systems, Ethics, professionalism and employability in computing, Data Recovery and Analysis, Networking and Operating Systems, current issues in computing.

Group Projects: Ethics, professionalism and employability assessment and presentation on Video games.

2016 - 2019   Dover Technical College
BTEC Level 3 Extended Diploma in IT (QCF) PPP (PASS, PASS, PASS)

2011 - 2016   Dover Christ Church Academy
6 GCSE passes at A-C grades including Maths, English and Science

Technical Skills:

- Competent with **MS Office & Windows 7, 8 & 10,**
- Knowledge surrounding **Hardware and building computers**
- Knowledge of **LINUX & UNIX**

Work History:

2019   **Work Experience   ADM Computing   Canterbury**

- Worked in the following areas: Workshop (IT Hardware repairs and assisting with server build), Dismantled and re-assembled PC and Laptop, installed operating applications, ran diagnostic software to confirm hardware issues and possible upgrade requirements.

- Other duties included participation in Remote Support and Customer onsite Visits.

Skills:

Communication
*During my time at college and university presented to the class on various occasions as part of units/modules.
*Communicated with family and friends appropriately when talking about their technical problems so they could understand properly.
*Spoke and communicated with real life clients of ADM Computing during work experience.

Team Working
*Working within the i-Zone team at Christ Church has given me a greater awareness of the contribution each individual can make so that a project can be moved forward.
*Working with other students in group work and projects allowed me to lean how to effectively work as a team instead of a group of individuals.
*Taking part in airsoft as a hobby has allowed me to socialise more with strangers and improve team working skills.
* I have been organising and planning a holiday in Amsterdam that a group of my online friends will be going to. As they are from all over the globe, I have been making sure we are all coordinating together (sharing plans, arrival times, accommodation, etc).

Technical Aptitude
*Many years' experience of building and maintaining PCs for friends and family.
*Hosted gaming servers using FTP software and port forwarding.

Interests:

Keenly interested in the Cybersecurity word and regularly keep up with up to date in that sector. In my spare time I also am learning to play the guitar which takes a dedication to learn and patience. To also partake in airsoft, similar to paintball it allows me to keep fit and keep up my social skills by talking with strangers that share the same hobby.
